WATERSHED STUDIES

JOURNAL QUESTIONS

ROCK EAGLE'S ENVIRONMENTAL EDUCATION FIELD STUDY

Key Words: watershed, erosion, riparian buffer, runoff

1. Describe a watershed. What watershed do you live in?
2. How do humans effect erosion within a watershed? How does this affect the water bodies within the watershed?
3. How does increased erosion affect the plants/animals living within the stream ecosystem?
4. Why does stream monitoring help us determine a watershed's health? Describe one measurement you took during the stream monitoring and why it was important.
5. Explain how you can help keep your local watersheds healthy. How can your school? Your local community?

Making the best better!
